

Product information quick connect system 203^N

Quick connections made of aluminum for the direct push-in connection of plastic tubes in air suspension systems

- Fixed tube retaining ring, axially rotatable
- Integrated tube stop
- Short connection port possible; compatible with special bore of VOSS quick connect systems 203
- Disassembly of tube/quick connect system possible
- No assembly plug
- Optional dirt plug on customer demand

The optimized classic

VOSS quick connect system 203^N

- Integrated assembly made of aluminum
- Nominal sizes 4 and 6
- For the connection of polyamide tubes
- For pneumatic applications,
for fuel applications on requests
- Max. 22 bar operating pressure, in compliance with
the application limit of the PA tube acc. to DIN 73378
- Burst pressure ≥ 45 bar
- Temperature range -40 °C to $+100/120$ °C
